SFC OUTSOLE

The extremely slip-resistant Shoes For Crews outsole is designed to support the prevention of slips, falls and trips on wet, greasy and oily surfaces. It highly exceeds the industry norm SR according to EN ISO 20344:2021 slip resistance test. The outsole has clog-resistant traction lugs, which won't let dirt and debris get stuck in the outsole.

idCELL

The idCELL element in the heel area consists of EVA - a very soft, shock absorbing material. It perfectly absorbs impacts and shocks when the heel strikes the ground.

EVA MIDSOLE

Thousands of tiny bubbles in this ultra lightweight midsole ensure an optimal cushioning and improve the flexing action of the foot.

COMFORT FOOTBED

The anatomically shaped footbed provides optimal cushioning with every step. The specially designed arch support enables the foot to be naturally positioned in the shoe and stimulates the muscles when walking.
